

Vendor Conditions of Use

1. This material (**TLF Content**) is made available by The Learning Federation (**TLF**) to vendors of learning management systems, digital repositories and software applications for the school education sector under a **Licence Deed**. TLF is a project managed by Curriculum Corporation.
2. This summary of licence terms (**the Conditions**) is provided to assist the vendor (**You**) to understand what is permitted and what is not permitted to be done using TLF Content.
3. TLF Content is material developed by or for TLF. Copyright in TLF Content is owned by Curriculum Corporation. You may Use TLF Content for the following activities only:
 - To test connectivity and the ability of You to download from the Exchange;
 - To test learning management systems, digital repositories or software applications in Australia and New Zealand that are for the school education sector; and
 - To demonstrate learning management systems, digital repositories or software applications in the Australian and New Zealand school education sector.
4. **'Use'** includes:
 - to read, view, play, perform, operate or execute TLF Content (depending on its nature and format), within the functionality that is offered to an ordinary user
 - to make Copies of TLF Content
5. You must not develop a Derivative from TLF Content.
6. You must not supply TLF Content to any third person or entity unrelated to You.
7. You must not do anything with TLF Content which would:
 - infringe the Moral Rights of the author
 - be misleading or deceptive.
8. You must not:
 - circumvent any Technological Protection Measure
 - interfere with any Electronic Rights Management Information.

9. Other capitalised expressions in these Conditions have the following meanings:

- Compilation** Means a collection of items (which may or may not individually have copyright) which are assembled together using sufficient skill and care as to attract copyright protection for the collection as a whole.
Examples:
- inclusion of a learning object in an online course
 - inclusion of a learning object in a set of professional development materials
- Copy** Means a reproduction of TLF Content in the same or a different medium, but without any other alteration.
Examples:
- printing out a web page that has been downloaded to a browser
 - conversion of an image between different formats such as TIF, BMP, JPEG, etc
- Derivative** Means any work derived from or developed from TLF Content, including:
- an Edited Version
 - Enhancements
 - Supplementary Work
 - a Compilation
- Edited Version** Means a modified version of TLF Content in which the changes made are of such a minor nature that no fresh layer of copyright can be said to arise. Examples:
- changes to names or addresses in a story
 - minor substitution of the legend or legend elements depicted on the map
- Electronic Rights Management Information** Means information:
- identifying TLF Content, the author and/or copyright owner, including the Acknowledgments statement
 - indicating conditions on which TLF Content may be used, including these Conditions of Use.

Enhancements	<p>Means modifications to TLF Content in which new copyright arises, but only to the extent that the Enhancements cannot meaningfully inform or entertain independently of the original TLF Content. Examples:</p> <ul style="list-style-type: none"> – translation of a story into a different language – substantial revision and re-arrangement of an article – conversion of an image from 2 dimensions into 3 dimensions
Exchange	<p>Means the Exchange repository established by TLF, which consists of</p> <ul style="list-style-type: none"> -- TLF Content -- Infrastructure -related software systems and code
Moral Rights	<p>includes the following rights of an author of TLF Content:</p> <ul style="list-style-type: none"> – the right of attribution of authorship – the right of integrity of authorship – the right not to have authorship falsely attributed
Supplementary Work	<p>Means substantial additional work which appends, incorporates, is appended to, or is incorporated into, TLF Content, and which has some capacity to inform or entertain independently of the original TLF Content, but does not include Enhancements. Examples:</p> <ul style="list-style-type: none"> – creation of a set of metadata to accompany a learning object – addition of a new stylised cartoon character to an interactive game
Technological Protection Measure	<p>Means a device or process designed to inhibit infringement of copyright in that TLF Content by either of the following:</p> <ul style="list-style-type: none"> – by ensuring that TLF Content is accessible solely by use of an access code or process approved on behalf of the copyright owner – through a copy control mechanism

10. Where You Use TLF Content in accordance with the Licence, You do not need to comply with the requirements of any statutory licence (eg, to pay royalties to a copyright collecting society for that TLF Content).
11. The Licence Deed between TLF and You sets out more complete conditions of the licence.
